Attention: Lander Robinson

Dear Mr Robinson

QUORN PARK SOLAR FARM (SSD 9097) SUBMISSIONS REPORT

We recently sent you the Submissions Report for Quorn Park Solar Farm. In the report, we have responded to the submissions from the public and agencies in detail, providing clarification with respect to the project proposal and its impacts.

In response to submissions, we have made the following changes to the project.

1. Limited the area for location of the substation, control room and battery storage. The area in the south west corner of the site to the west of TransGrid's 132kV overhead line is now excluded from the area being considered for their location. This is shown by the revised green cross hatching in the new Figure 6 Development Footprint in the report.
2. Confirmed that all underground cabling will be removed upon decommissioning (previously proposed to leave inground any cabling deeper than 800mm)

Please contact me in respect of the above matters should any clarification be required.

Yours faithfully

Colin Liebmann
Director
